- Accountability

Language

Coding Projects

PokeDex

A Small web application built with HTML, CSS, JavaScript, Bootstrap and jQuery that display a list of items loaded from external API.

myFlix-API

The server-side component of a movie web application. It's a REST API using Node.js, Express, and MongoDB.

myFlix-Client(React)

The application is a single-page, client-side application of myFlix-API. The application was built by using React, React Redux and Bootstrap.

myFlix-Client(Angular)

This is also the client-side application of myFlix-API, but using Angular and Angular-materials instead of React.

Meet

Meet is a serverless, progressive web application(PWA) built with React using test-driven development(TDD) technique. The application uses the Google Calendar API to fetch upcoming events.

Chat App

It is a chat application for mobile devices built with React Native, Expo, Google Firestore Database authentication, Firebase Cloud Storage and Gifted Chat

Library. The app provides users with a chat interface and options to share images and their locations.
